FARMACÊUTICA

INNOVATION AND TECHNOLOGY FOR LIFE

THIS IS THE MISSION OF A COMPANY THAT PURSUES EXCELLENCY.

Blau Farmacêutica is currently one of the leading pharmaceutical companies in LATAM countries making highly complex medicines, which are essential to human health, specialized in oncology, nephrology, hematology, infectology and among others.

Located in the city of Cotia at São Paulo metropolitan center, Blau Farmacêutica has three “state of the art” production sites with fourteen production areas sorted by therapeutic class, using the most modern production and quality control equipments. Its manufacturing sites comply with the good manufacturing practices and quality control required by the most demanding sanitary authorities in the world, including Anvisa, Invima and others.

Blau

The analytical methodologies used for quality control follow both Brazilian and international monographies in their latest releases and utilizes the company's own developed validated methods. Its equipments are qualified and its processes validated using modern tools to ensure the quality of the process with safety and traceability information.

The R&D department of Blau Farmacêutica is divided in two expertise sectors: biological products and synthetic drugs. They develop new products, formulations, processes and analytical methodologies. They use the latest generation of equipments, which are only found at universities and advanced research laboratories. It has a professional team that includes Post-Doc, Doctors, Masters and others.

Its quality policy called “BLAU TOTAL QUALITY” aims to always seek, encourage, renew and modify, requiring the highest quality and technology in every process, product, environment and life, prioritizing ethics and continuous improvement.

This year, Blau Farmacéutica celebrates 29 years of success and growth, including in its career the development of more than 100 different pharmaceutical products meeting various therapeutic specialties.

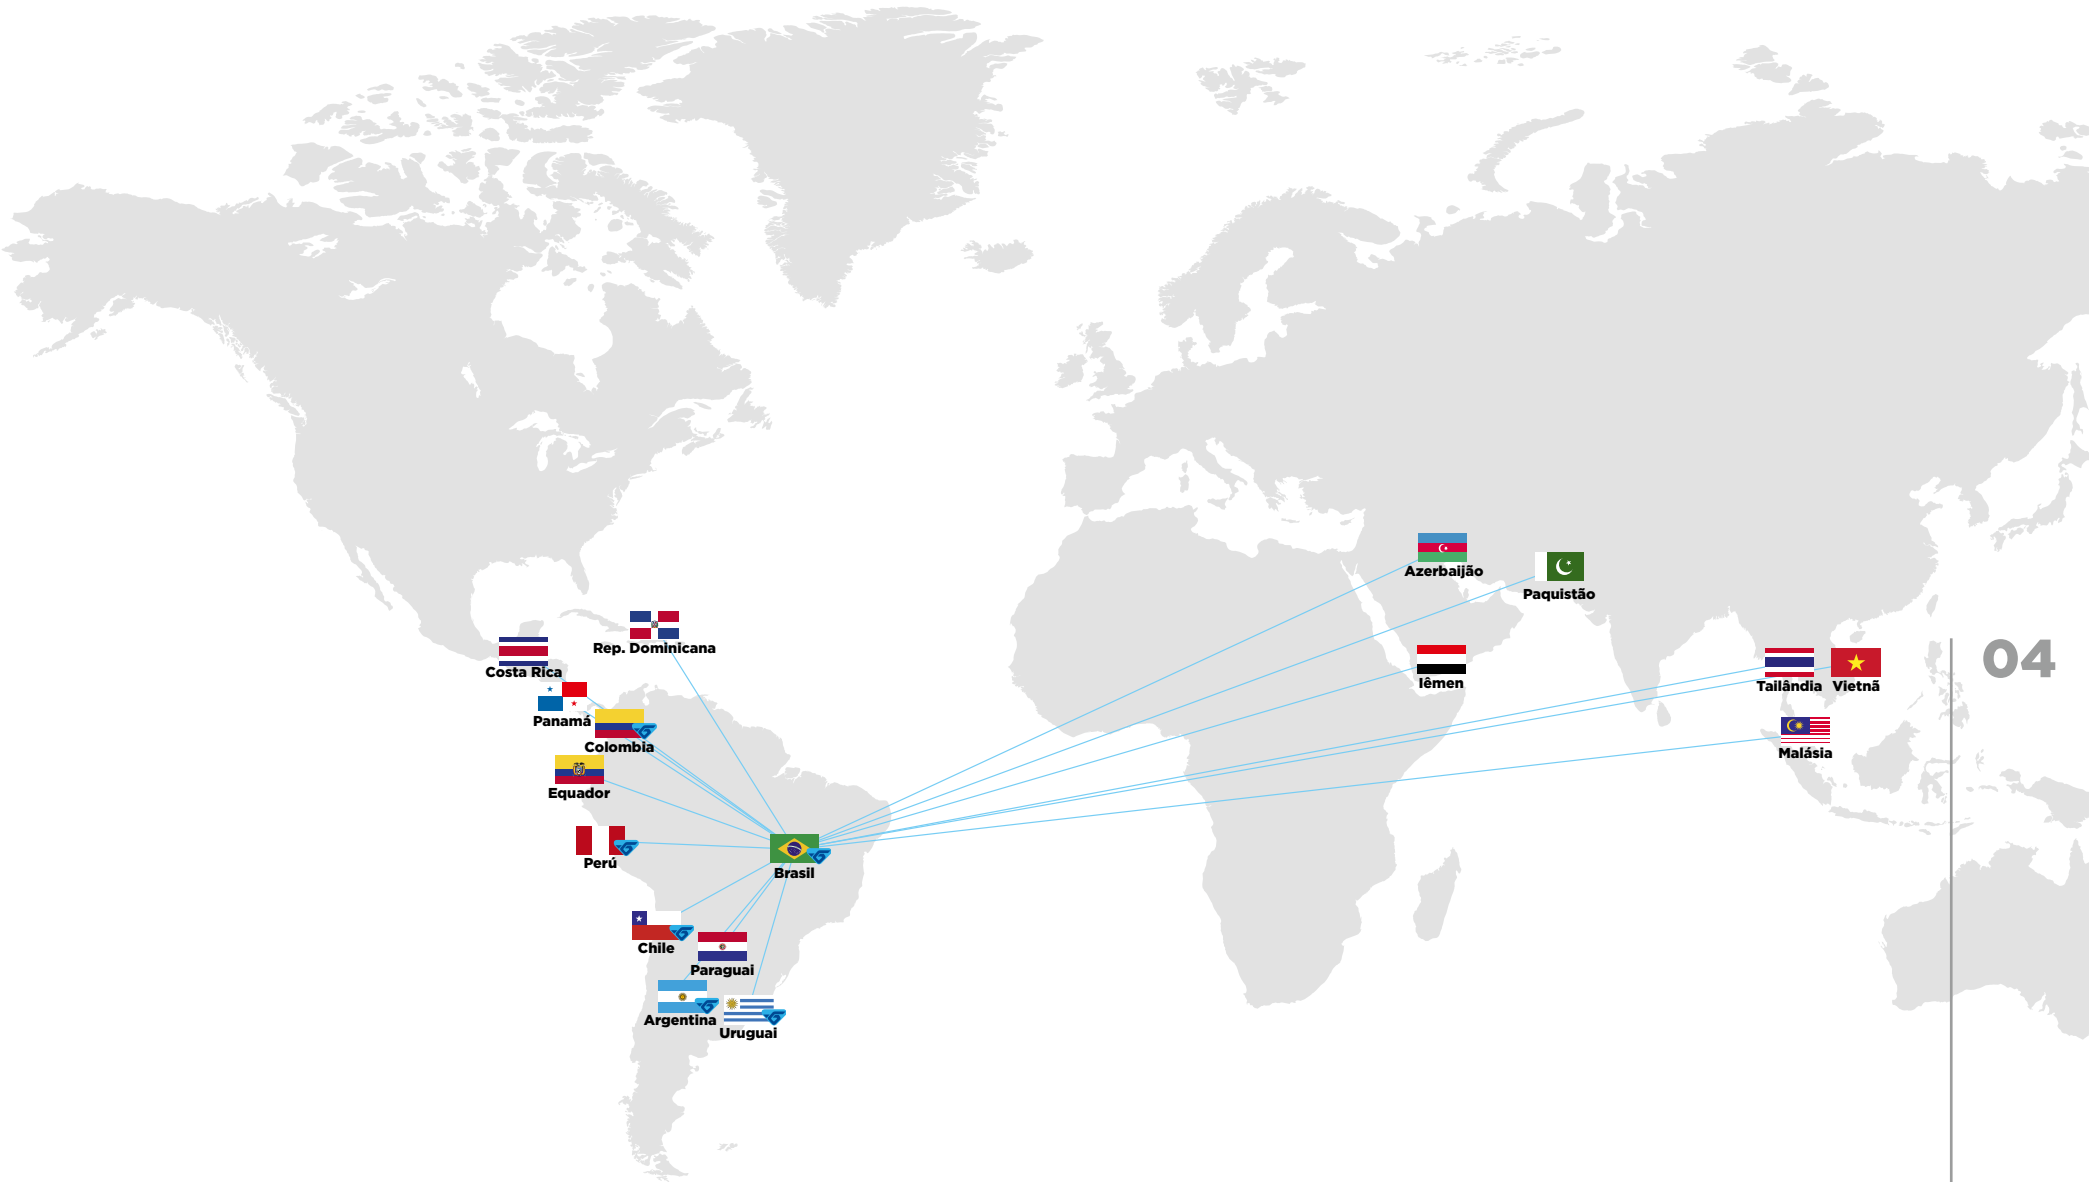

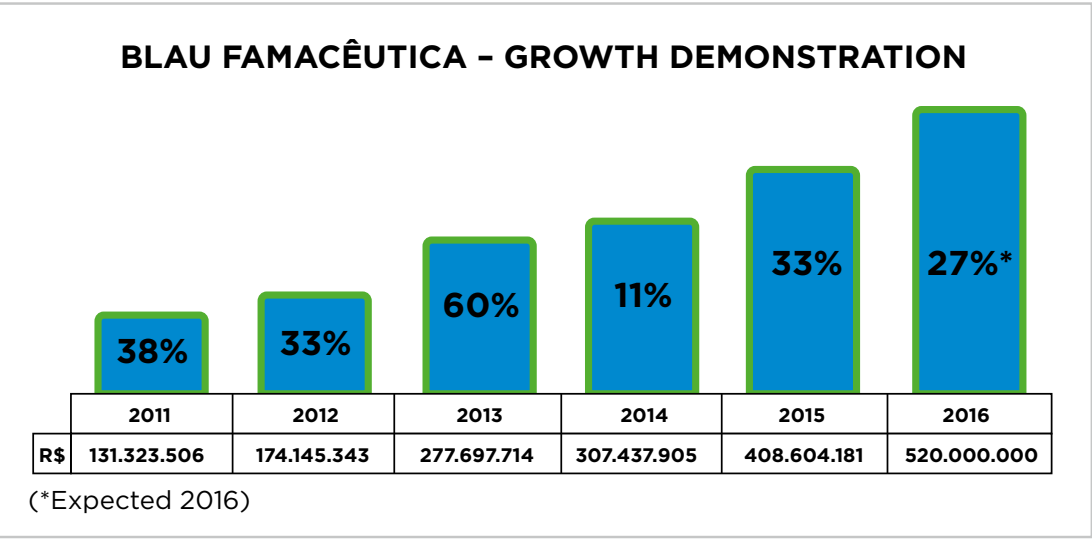

Blau

The company currently has three subsidiaries in LATAM countries, including Brazil, Uruguay and Colombia and it is opening another three: Argentina, Chile and Peru. Their growth strategy combined with the full acceptance of its products by the new markets is resulting in the growing demand of their product line not only in the LATAM countries, but also in many other countries around the world, where the company already exports its products to, due to their technical competence which ensures the quality, efficacy and safety for its medicines.

Blau has maintained an incredible growth of the 2-digit order in the last 5 years. Its plan is so bold, daring and well-controlled, which is possible to achieve such results in the face of many economic, social and market scenarios.

BIOPHARMACEUTICALS

Epoetin alpha - rHu (epo)
Interferon alpha 2a - alpha 2a (ifn)
Interferon alpha 2b - alpha 2b (ifn)
Filgrastim - rHu - (g-csf)
Molgramostim - (gm-csf)
Interferon beta 1a - (ifn)
Interleucin - rHu - (il2)
Somatropin - rHu - (GH-growth hormone)

BIOSIMILARS

Epoetin alfa - rHu (epo) - Eritromax
Filgrastim - rHu - (g-csf) - Filgrastine

ONCOLOGICAL - INJECTABLE

Carboplatin - B- Platin
Cisplatin - C- Platin
Oxaliplatin - Generic
Cytarabine - Citarax
Etoposide - Epósido
Gemcitabine - Generic
Dacarbazine - Generic
Docetaxel - Generic
Epirubicin - Generic
Idarubicin - Generic
Fludarabine - Generic
Ifosfamide - Generic
Irinotecan - Generic
Pemetrexed - Generic
Vinblastine - Generic
Vincristine - Generic
Vinorelbine - Generic
MTX - methotrexate - Generic
Mesna - Generic
Zoledronic acid - Generic
Ondansetron - Ontrax

ONCOLOGICAL - Oral

Tamoxifen - Taxofen
Methotrexate disodium (Oral) - Methotrexate
Flutamide - Generic

Bicalutamide - Generic
Anastrozole - Generic
Letrozole - Generic
Exemestane - Generic

BLOOD PRODUCTS

Human Immunoglobulin Sol IV - Immunoglobulin
Human Albumin 20% - Blaubimax

ANTIVIRAL AND ANTIRETROVIRALS

Acyclovir - Generic
Famciclovir - Fanclomax
Ganciclovir - Ganvirax
Ribavirin - Ribavirin
Lamivudine - Vudirax

UTERINE STIMULATOR

Oxytocin - Generic

ANAESTHETICS

Propofol - Propofol
Lidocaine HCl - Generic
Succinylcholine - Succitrat
Etomidate - Generic
Remifentanil - Suremifen

ANTITHROMBOTICS

Swine Sodium Heparin - Hepamax
Sodium Enoxaparin - Enoxalow

THROMBOLYTICS

Streptokinase - Streptokinase

ANTIRHEUMATIC

Methotrexate disodium (Oral) - Methotrexate

FEMALE HEALTH CARE

Tinidazole + Miconazole Nitrate - Anfugine
Tetracycline + Amphotericin - Novasutin
Miconazole Nitrate - Generic
Tioconazole - Generic

ANTIBIOTICS

Penicillanics

Benzyl Penicillin g potassium - Aricilina
Ampicillin Sodium - Cilinon
Amoxicillin + Clavulanate Potassium - Doclaxin
Oxacillin Sodium - Oxanon
Benzyl Penicillin procaine + potassium - Penkaron
Piperacillin + tazobactam - Pipertazo

NON BETA LACTAMS

Amikacin Sulfate - Amicilon
Vancomycin Hydrochloride - Generic
Teicoplanin - Teicoston
Lincomycin Hydrochloride - Linatron
Ciprofloxacin - Cifloxtron
Meropenen - Generic
Clindamycin - Clindarix
Clarithromycin - Sumiclar

CEPHALOSPORIN

Cephalothin Sodium - Generic
Cefoxitin Sodium - Cefton
Ceftazidime Pentaideratada - Ceftazidon
Cefazolin Sodium - Fazolon
Cefotaxime - Clafordil
Ceftriaxone disodium Hemieptaidratada - Generic
Ceftriaxone disodium Hemieptaidratada - Triaxton

CHLORAMPHENICOL

Sodium Succinate of Chloramphenicol - Arifenicol

ACID PUMPER INHIBITOR

Omeprazole - Oprazon
Pantoprazole - Generic

OTHER HOSPITAL PRODUCTS

Saccharate Ferric Hydroxide - Ferropurum
Atropine Sulfate - Atropion
N-acetylcysteine - Generic
Hydrocortisone - Generic
Diclofenac Sodium - Generic
Dopamine Hydrochloride - Dopabane
Furosemide - Furosetron
Calcium Gluconate
Adrenalin - Efrinalin
Dobutamine - Dobutariston
Magnesium sulfate - Magnoston
Dexamethasone - Metaxon
Aminophylline - Minoton
Verapamil Hydrochloride - Vasoton
Phytomenadione (synthetic vitamin K) - Vikatron
Tranexamic Acid - Generic
Tiocolchicosideo - Generic
Methylprednisolone - Sumitric

PIPE LINE

Imatinib
Erlotinib
Bortezomib
Sorafenib
Bendamustine Hydrochloride
Capecitabine
Temozolomide
Fluvestranto
Polymyxin B
Liraglutide
Hydroxyurea
Salbutamol

Blau Farmacêutica has a clinical and nonclinical research department, to conduct post-marketing surveillance (PMS/ Phase IV) studies, prospective studies (Phase I, II and III) and bioequivalences to prove the quality, effectiveness and safety of its drug products, always following good clinical practices and the applicable regulations. This department utilizes tools that assure the confidentiality and security of the information.

Blau Farmacêutica's quality assurance goes beyond its own limits, auditing and qualifying suppliers and customers in order to ensure the quality and the traceability of its medicines in the entire productive chain, to the extent of the medicine being administered to the patients.

Blau has a department of information and technology (IT) that uses the most modern tools to be connected with its customers and employees, obtaining quick answers and control of the information; Blau also has a department for customer services with a trained team to attend patients and healthcare professionals.

Its Pharmacovigilance system is always monitoring the adverse reactions in order to find any unknown risks and propose, if necessary, measures for managing and minimizing risks.

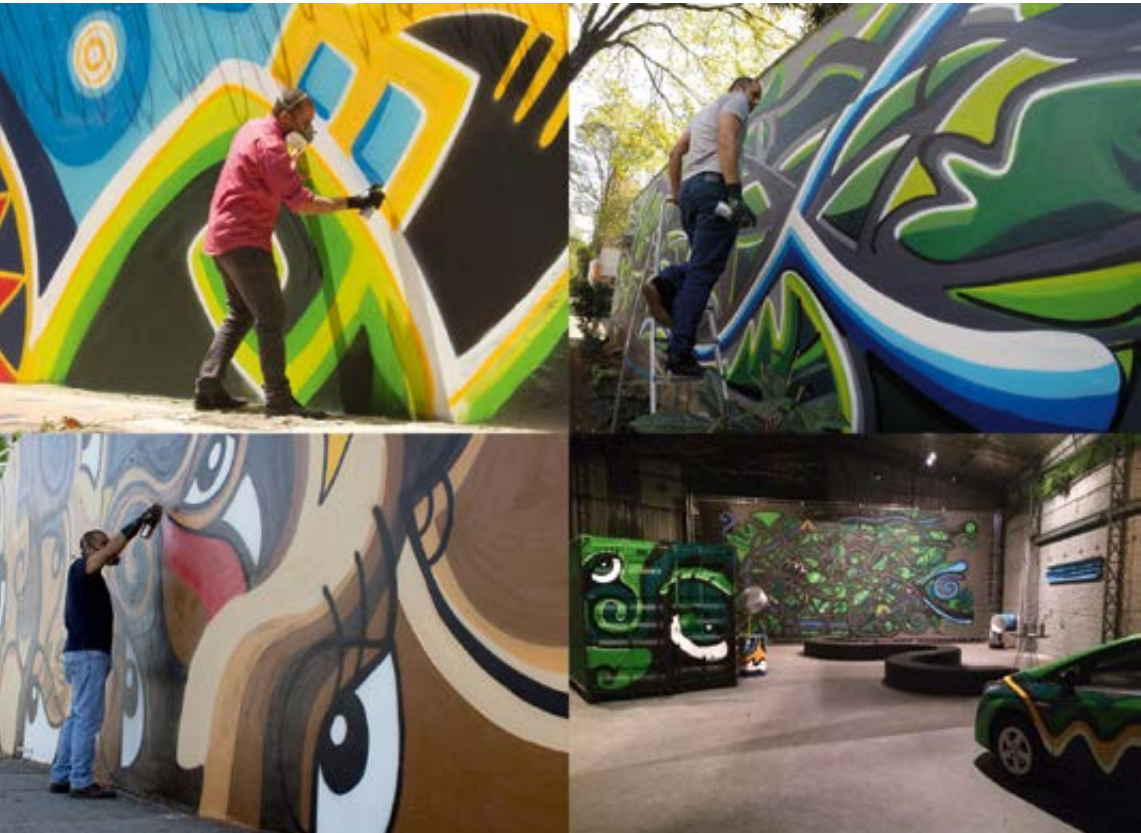

Blau farmacêutica besides engaging to develop and produce medicines, is strongly engaged to social commitment to help many charitable institutions to carry out social work.

Besides that, the company sponsors many different cultural and sports projects, working both with and without government support. Thus, it promotes the exercise of citizenship, working for a fairer society.

Blau

Blau believes that one way of improving social health is through sports activities. Therefore it supports all kind of sports, highlighting the car racing.

Blau

The commitment that Blau has with continued growth is no excuse for the company to forget what really matters: the environment and the population across the entire planet. Therefore, Blau has also been investing heavily in sustainability through internal activities aimed at environmental preservation.

Blau Farmacêutica knows how to value its stakeholders. Without them, it would not be possible to write a story of success. These highly skilled professionals, together with the technology present in the company, have been enabling Blau to be part of something much greater than the company itself. For this reason, we have learnt throughout the years to value respect and solidarity on a daily basis.

This attitude has led to an increase in performance inside the company and increased the quality of its products and services.

This is Blau, an innovative company that strives to improve and go beyond excellency in order to ensure that the largest number of people have access to the most valuable asset that exists: **a healthy life.**
